AtliQ Hardware – Problem Statement

Codebasics Data Analytics Bootcamp · Excel Project

1. Business Overview

AtliQ Hardware is a fast-growing company that sells computer hardware: PCs, mice, keyboards, printers, storage and networking products. Its business model is similar to Dell or HP. AtliQ sells to **customers** (stores and online platforms), and those customers sell to **consumers** like you and me.

Customer types (platform)

• **Brick & Mortar:** physical stores such as Croma and Best Buy.

• **E-Commerce:** online marketplaces such as Amazon and Flipkart, plus AtliQ's own e-store.

Sales channels (business model)

Channel	How AtliQ sells	Examples
Retailer	Sells to retail chains and marketplaces, which sell on to consumers	Croma, Best Buy, Amazon, Flipkart
Direct	Sells straight to consumers through its own stores	AtliQ e-Store, AtliQ Exclusive
Distributor	Sells through a middleman where direct sales aren't possible	Markets such as China, South Korea

2. Background

AtliQ grew quickly, but its expansion into **Latin America (LATAM)** ended in heavy losses. The decisions behind it were based on surveys and intuition, not data. In a recent strategy meeting, data analytics became a top agenda item. Excel-based analysis no longer scales with the size of the company, and Dell, a much larger competitor with a big analytics team, is growing fast. A data analytics team has been hired to give management accurate, data-backed and transparent reports.

3. Problem to Solve

Using Excel, build reports that answer the following business questions:

1. What are the top 10 products by percentage increase in net sales from 2020 to 2021?

2. Generate a "Division" report showing net sales for 2020 and 2021 along with the growth percentage.

3. Which products rank in the top 5 and bottom 5 by quantity sold?

4. What are the new products AtliQ began selling in 2021? (Hint: find rows with no 2020 sales in the "21 vs 20" column.)

5. What are the top 5 countries by net sales in 2021?

4. Data Provided

• fact_sales_monthly: monthly quantity and net sales by product and customer

• dim_customer, dim_product, dim_market: customer, product and market details

• ns_targets_2021: monthly net-sales targets by market

• report_templates.pdf and sales_market_report.xlsx: report layouts and a starting workbook
